

Acquisition Brief — payrisk.ai

Domain name / Asset offered: payrisk.ai

Purpose: acquisition of a strategic positioning asset for **payments risk** (fraud, chargebacks, SCA/3DS2, KYC/KYB, real-time monitoring) across **PSR/PSD3 (EU)**, **PCI DSS 4.0** and **DORA** (critical third parties).

This document — who it's for, why

Decision-grade brief for **CEO / COO / CFO / CTO / Risk & Compliance** (PSPs, banks, fintechs, high-volume merchants).

Thesis: using the exact category name provides operational and reputational edge.

PAYRISK.AI is a neutral, memorable banner to align **Finance, Risk, Product, Data/ML and Compliance** around one goal: **lower cost of risk** while accelerating customer adoption.

1) One-page decision

What it is. A **strategic asset** (.ai) for **payments risk management**: public portal, references, resources, ecosystem communications.

What it changes. A **single entry point** → clearer risk governance, less cross-functional friction, shorter **time-to-trust** with clients/partners.

What you can deploy today.

- **“PayRisk — Readiness & Rollout.”** Flow mapping (cards, A2A, wallets), fraud/chargeback matrices, SCA scenarios, segment-based action plan.
- **Resource center.** **PSD3/PSR** guides, **PCI DSS 4.0** good practices, fraud investigation playbooks, KPI templates (FRR, dispute rate, recovery).

- **Ecosystem voice.** Merchant/PSP primers, EU milestone calendar, vertical use cases.
- Why it's defensible. Exact term with C-suite readability.**
-

2) Context & milestones

PSR/PSD3 (EU): stronger SCA and anti-fraud regime; tighter PSP oversight.

PCI DSS 4.0: higher control expectations (authentication, segmentation, continuous testing).

DORA: operational resilience, critical third-party oversight, testing and incident reporting.

Implication: immediate need for a neutral banner to orchestrate **controls, data & compliance** with merchants, PSPs and partners.

3) Three concrete deployments

A. PSP / Bank (group program). Fraud/chargeback roadmap, SCA/3DS2 optimisation, real-time monitoring.

B. High-volume merchant. Lower **dispute rate** and **false decline**.

C. Risk vendor / Fintech. Instant credibility, shorter sales cycles.

4) Strategic edge of the asset

C-level clarity. **Defensive** (exact-match .ai, readable, memorable). **Re-use** of content, kits, connectors and relationships under a single surface.

5) Market size & pressure

From 2025–2030, **CAPEX/OPEX** rise across fraud, SCA, PCI audits and resilience. Market pressure (A2A/APP scams, instant payments, rising disputes) demands a **narrative standard** and a **visible hub**; **PAYRISK.AI** provides both.

6) CFO anchors (obligatory)

6.1 Alternative cost — awareness & adoption. Without an exact-match: 6–12-month campaign, internal brand architecture, change management.

6.2 Cost of delay. Slip one budgeting cycle = avoidable fraud, scheme penalties, lost

disputes, higher insurance cost.

6.3 Reusable synergies. Under a **single banner**, each euro (content, kits, connectors, relationships) is **re-used** → shorter time-to-trust, faster cycles, lower unit costs.

7) Investment logic (no public pricing)

SEO & memorability (exact term). **Strategic premium** (2025–2028 window). **Budget lens:** instead of spreading budgets across campaigns/change, a **single asset** accelerates go-to-market and lowers **compliance CAC**.

8) Clean acquisition process (Legal/Finance)

Scope of sale: payrisk.ai only.

Escrowed transaction, fast technical transfer, invoice. Options: **cash / staggered 40-30-30**. NDA and asset audit available.

Legal notice: descriptive name, **no affiliation**.
